

HUTTIG BUILDING PRODUCTS

2013 Annual Report

To our Valued Shareholders:

In our 2012 letter to shareholders I talked about our journey from being in the middle of the forest, to approaching the tree line, to being out of the woods. That journey continued in 2013 as we reported our first net profit since 2005. It has not been an easy journey to say the least. We instituted significant restructuring activities through the housing downturn, beginning in 2006. Many employees and their families were impacted. While incredibly difficult, in a fight for survival, these actions were for the greater good of this 129-year old company, our employees, and our stakeholders.

Today, Huttig has returned to profitability. Our employee base is growing again. We had 8% sales growth in 2013. Our gross margins increased from 19.3% to 19.8%. We levered our operating expenses from 18.9% of sales to 18.7% of sales while making significant reinvestments back into the business.

First and foremost, we reinvested in our people through the implementation of widespread wage reinstatements, as well as variable compensation and professional development programs. We also increased our investment in technology. We upgraded our IT infrastructure, ERP system, and our customer interface technology platform – Huttig Doorway (Doorway). We successfully developed and implemented version 2.0 of Doorway, a proprietary, cloud-based door quotation system that provides our customers with the ability to configure and price pre-hung interior and exterior door units, making it easier for our customers to do business with us. Lastly, we made significant investments in our facilities and transportation fleet to accommodate future growth.

We generated net income from continuing operations of \$3.6 million in 2013 as compared to a loss of \$0.1 million in 2012. Our customer service index, which we use to measure complete and on time service performance, continued to improve, and is now at its highest level since we began measuring in 2007.

As we look forward, we will continue to focus on our core priorities:

- Margin enhancement;
- Profitable sales growth;
- Improve the customer experience;
- Operational improvement;
- Invest in our people

We are also very excited that, in December 2013, we became listed on the NASDAQ. This is very positive for our shareholders, both existing and prospective, and speaks to the successful turnaround depicted in our financial results.

As we continue to execute on these priorities, we will be well positioned to take advantage of a recovering housing market to deliver strong financial results for our shareholders.

One of Huttig's distinct advantages is our national footprint which, when combined with our product brands and service capabilities, differentiates us in the marketplace. We believe we are the leading supplier of pre-hung doors to the pro channel in the United States. But this is only one aspect of our unique line of product and value-added service capabilities. We also have a strong, growing line of specialty building products, from top manufacturers, which makes us a one-stop shop for millwork and building products.

We will continue to lever our national footprint, market advantages, breadth of strong product lines, and our focus on the customer experience to put us in position to become the distributor of choice for our customers. Through the housing downturn, we have retained and developed a strong base of employees who are committed to helping us achieve this objective.

In closing, I would like to express my continued gratitude to our customers, who have given us the opportunity to serve them, our supplier partners, who have supported us through even the most difficult times in our industry, and our employees who have made many personal sacrifices for the good of our company. I would also like to thank our shareholders for their ownership and commitment to Huttig. I am thankful for the opportunity to be of service to all our stakeholders and am very excited about our future. Huttig is a wonderful organization and we are committed to delivering on our capabilities to continue to increase the value of the company.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. Vrabely', with a long horizontal stroke extending to the right.

Jon P. Vrabely

President and Chief Executive Officer

Non-accelerated filer

Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the Common Stock held by non-affiliates of the registrant as of the last business day of the quarter ended **June 30, 2013** was approximately \$50 million. For purposes of this calculation only, the registrant has excluded stock beneficially owned by the registrants' directors and officers. By doing so, the registrant does not admit that such persons are affiliates within the meaning of Rule 405 under the Securities Act of 1933 or for any other purposes.

The number of shares of Common Stock outstanding on **February 10, 2014** was 24,656,211 shares.

DOCUMENTS INCORPORATED HEREIN BY REFERENCE.

Parts of the registrant's definitive proxy statement for the 2014 Annual Meeting of Shareholders are incorporated by reference in Part III of this Annual Report on Form 10-K.

PART I

ITEM 1—BUSINESS

General

Huttig Building Products, Inc., a Delaware corporation incorporated in 1913, was founded in 1885 and is a leading domestic distributor of millwork, building materials and wood products used principally in new residential construction and in home improvement, remodeling and repair work. We purchase from leading manufacturers and distribute our products through 27 wholesale distribution centers serving 41 states. Our distribution centers sell principally to building materials dealers, national buying groups, home centers and industrial users, including makers of manufactured homes. For the year ended December 31, 2013, we generated net sales of \$561.5 million.

We conduct our business through a two-step distribution model. This means we resell the products we purchase from manufacturers to our customers, who then sell the products to the final end users, who are typically professional builders and independent contractors engaged in residential construction and remodeling projects.

Our products fall into three categories: (i) millwork, which includes doors, windows, moulding, stair parts and columns, (ii) general building products, which include composite decking, connectors, fasteners, housewrap, roofing products and insulation, and (iii) wood products, which include engineered wood products, such as floor systems, as well as wood panels and lumber.

Doors and engineered wood products often require an intermediate value added service between the time the product leaves the manufacturer and before it is delivered to the final customer. We perform such services, on behalf of our customers, which include pre-hanging doors and cutting engineered wood products from standard lengths to job-specific requirements. In addition, with respect to the majority of our products, we have the capability to buy in bulk and disaggregate these large shipments to meet individual customer stocking requirements. For some products, we carry a depth and breadth of products that our customers cannot reasonably stock themselves. Our customers benefit from our business capabilities because they do not need to invest capital in door hanging facilities or cutting equipment, nor do they need to incur the costs associated with maintaining large inventories of products. Our size, broad geographic presence, extensive fleet and logistical capabilities enable us to purchase products in large volumes at favorable prices, stock a wide range of products for rapid delivery and manage inventory in a reliable, efficient manner.

We serve our customers, whether they are a local dealer or a national account, through our 27 wholesale distribution centers. Our broad geographic footprint enables us to work with our customers and suppliers to ensure that local inventory levels, merchandising, purchasing and pricing are tailored to the requirements of each market. Each distribution center also has access to our single-platform nationwide inventory management system. This provides the local manager with real-time inventory availability and pricing information. We support our distribution centers with credit and financial management, training and marketing programs and human resources expertise. We believe that these distribution capabilities and efficiencies offer us a competitive advantage as compared to those of many local and regional competitors.

In this Annual Report on Form 10-K, when we refer to “Huttig,” the “Company,” “we” or “us,” we mean Huttig Building Products, Inc. and its subsidiary and predecessors unless the context indicates otherwise.

Industry Characteristics and Trends

The residential building materials distribution industry is characterized by its substantial size, its highly fragmented ownership structure and an increasingly competitive environment. The industry can be broken into two categories: (i) new construction and (ii) home repair and remodeling.

Residential construction activity in both categories is closely linked to a variety of factors directly affected by general economic conditions, including employment levels, job and household formation, interest rates, housing prices, tax policy, availability of mortgage financing, prices of commodity wood and steel products, immigration patterns, regional demographics and consumer confidence. We monitor a broad set of macroeconomic and regional indicators, including new housing starts and permit issuances, as indicators of our potential future sales volume.

New housing activity in the United States has shown modest improvement each year since 2009, the trough period of the recent housing downturn. However, 2013 activity is still below the historical average of total housing starts from 1959 to 2013 of approximately 1.5 million starts based on statistics tracked by the US Census Bureau (“Historical Average”). Total new housing starts in the United States were approximately 0.9 million, 0.8 million and 0.6 million in 2013, 2012 and 2011, respectively. Single family starts were 0.6 million, 0.5 million and 0.4 million in 2013, 2012 and 2011, respectively, based on data from the U.S. Census Bureau. According to the U.S. Census Bureau, total spending on new single family residential construction was \$169 billion, \$132 billion and \$108 billion in 2013, 2012 and 2011, respectively.

We service large local, regional and national independent building products dealers who in turn sell to contractors and professional builders. These large local, regional and national building products dealers, often referred to as “pro dealers,” continue to distribute a significant portion of the residential building materials sold in the United States. These pro dealers operate in an increasingly competitive environment. Consolidation among building products manufacturers favors distributors that can buy in bulk and break down large production runs to specific local requirements. In addition, increasing scale and sophistication among professional builders and contractors places a premium on pro dealers that can make a wide variety of building products readily available at competitive prices. In response to the increasingly competitive environment for building products, many pro dealers have either consolidated or formed buying groups in order to increase their purchasing power and/or service levels.

We generally do not compete with building products mass retailers such as The Home Depot and Lowe’s. Their business model for building products is primarily suited to sell products that require little or no differentiation with very high turn volumes. Conversely, a substantial portion of our product offering consists of products that typically require intermediate value-added handling and/or a large breadth of SKUs.

We believe the evolving characteristics of the residential building materials distribution industry, particularly the consolidation trend, favor companies like us that operate nationally and have significant infrastructure in place to accommodate the needs of customers across geographic regions. We are the only national distributor of millwork products. Because of our wide geographic presence, size, purchasing power, material handling efficiencies and investment in millwork services, we believe we are well positioned to serve the needs of the consolidating pro dealer community.

Products

Our goal is to offer products that allow us to provide value to our customers, either by performing incremental services on the products before delivering them to customers, buying products in bulk and disaggregating them for individual customers or carrying a depth and breadth of products that customers cannot reasonably stock themselves at each location. Our products can be classified into three main categories:

- Millwork, including exterior and interior doors, pre-hung door units, windows, patio doors, mouldings, frames, stair parts and columns. Key brands in this product category include Therma-Tru, Masonite, Woodgrain Doors HB&G, Simpson Door, Huttig Windows, Windsor Windows, and Rogue Valley Door;
- General building products, such as roofing, siding, insulation, flashing, housewrap, connectors and fasteners, decking, drywall, kitchen cabinets and other miscellaneous building products. Key brands in this product category include Louisiana Pacific, Simpson Strong-Tie, Timbertech, AZEK, BP Roofing, Grace, Fiberon, Owens Corning, Typar, Atlas Roofing, Alpha Protech, and CertainTeed;

- Wood products, which include engineered wood products, such as floor systems, and other wood products, such as lumber and wood panels. Within the wood products category, engineered wood continues to be a focus product for us. The engineered wood product line offers us the ability to provide our customers with value-added services, such as floor system take-offs, cut-to-length packages and just-in-time, cross-dock delivery capabilities.

The following table sets forth information regarding the percentage of our net sales represented by our principal product categories sold during each of the last three fiscal years. While the table below generally indicates the mix of our sales by product category, changes in the prices of commodity wood products and in unit volumes sold could affect our product mix on a year-to-year basis.

	<u>2013</u>	<u>2012</u>	<u>2011</u>
Millwork	50%	47%	45%
Building Products	38%	42%	44%
Wood Products	12%	11%	11%

Customers

During 2013, we served over 4,000 customers, with one customer—Lumbermen’s Merchandising Corporation (“LMC”)—accounting for 12% of our sales in 2013 and 2012 and 11% of our sales in 2011. LMC is a buying group representing multiple building material dealers. Building materials pro dealers represent our single largest customer group. Our top 10 customers accounted for approximately 38% of our total sales in 2013.

Within the pro dealer category, a large percentage of our sales are to national accounts, including buying groups. These are large pro dealers, or groups of pro dealers, that generally operate in more than one state or region. To a lesser extent, we also sell to the retail home centers. We believe that our size, which lets us purchase in bulk, achieve operating efficiencies, operate on a national scale and offer competitive pricing, makes us well suited to service the consolidating pro dealer community. Our sales to national accounts, including buying groups, were 42% of our total sales in 2013 and 40% in each of 2012 and 2011.

Organization

Huttig operates on a nationwide basis. Customer sales are conducted through 27 distribution centers serving 41 states. Administrative and executive management functions are centralized at our headquarters office located in St. Louis, Missouri. We believe that this structure permits us to be closer to our customers and serve them better, while being able to take advantage of certain efficiencies of scale that come from our size.

Headquarter functions include those activities that can be shared across our full distribution platform. These include financial management, information technology, human resources, legal, internal audit and investor relations along with small corporate operations, marketing and product management groups.

Operating responsibility resides with each distribution center’s general manager. The general manager assumes responsibility for daily operations, including sales, purchasing, personnel and logistics. Each distribution center generally maintains its own sales, warehouse and logistic personnel supported by a small administrative team.

Sales

Sales responsibility principally lies with general managers at our distribution centers. The sales function is generally divided into two channels: outside sales and inside sales. Our outside field representatives make on-site calls to local and regional customers. Our inside sales people generally receive telephone orders from customers and support our outside sales function. In addition, we maintain a national account sales team to serve national customers. Our outside sales force is generally compensated by a base salary or draw plus commissions determined primarily on profit margin.

Distribution Strategy and Operations

We conduct our business through a two-step distribution model. This means that we resell the products that we purchase from manufacturers to our customers, who then sell the products to the final end user. Our principal customer is the pro dealer. To lesser extent, we also sell to the retail home centers and certain industrial users, such as makers of manufactured housing.

Despite our nationwide reach, the local distribution center is still a principal focus of our operations, and we tailor our business to meet local demand and customer needs. We customize product selection, inventory levels, service offerings and prices to meet local market requirements. We support this strategy through our single platform information technology system. This system provides each distribution center's general manager real-time access to pricing, inventory availability and margin analysis. This system provides product information both for that location and across the entire Huttig network of distribution centers. More broadly, our sales force, in conjunction with our product management teams, works with our suppliers and customers to get the appropriate mix, quantity and pricing of products suited to each local market.

We purchased products from more than 800 different suppliers in 2013. We generally negotiate with our major suppliers on a national basis to leverage our total volume purchasing power, which we believe provides us with an advantage over our locally based competitors. The majority of our purchases are made from suppliers that offer payment discounts and volume related incentive programs. Although we generally do not have exclusive distribution rights for our key products and we do not have long-term contracts with many of our suppliers, we believe our national footprint, buying power and distribution network make us an attractive distributor for many manufacturers. Moreover, we have long-standing relationships with many of our key suppliers.

We regularly evaluate opportunities to introduce new products. This is primarily driven by customer demand or market requirements. We have found that customers generally welcome a greater breadth of product offering as it can improve their purchasing and operating efficiencies by providing for "one stop" shopping. Similarly, selectively broadening our product offering enables us to drive additional products through our distribution system, thereby increasing the efficiency of our operations by better utilizing our existing infrastructure.

We focus on selling respected, brand name products. We believe that brand awareness is an increasingly important factor in building products purchasing decisions. We generally benefit from the quality levels, marketing initiatives and product support provided by manufacturers of branded products. We also benefit by being associated with the positive attributes that customers typically equate with branded products.

Competition

We compete with many local and regional building product distributors and, in certain markets and product categories, with national building product distributors. In certain markets, we also compete with national building materials suppliers with national distribution capabilities. We distribute products for some manufacturers that also engage in direct sales.

The principal factors on which we compete are pricing and availability of product, service and delivery capabilities, ability to assist with problem solving, customer relationships, geographic coverage and breadth of product offerings.

Our size and geographic coverage are advantageous in obtaining and retaining distribution rights for brand name products. Our size also permits us to attract experienced sales and service personnel and gives us the resources to provide company-wide sales, product and service training programs. By working closely with our customers and suppliers and utilizing our single information technology platform, we believe our branches are well positioned to maintain appropriate inventory levels and to deliver completed orders on time.

Seasonality, Market Conditions and Working Capital

Various cyclical and seasonal factors, such as general economic conditions and weather, historically have caused our results of operations to fluctuate from period to period. Our size, extensive nationwide operating model, and the geographic diversity of our distribution centers to some extent mitigate our exposure to these cyclical and seasonal factors. These factors include levels of new construction, home improvement and remodeling activity, weather, interest rates and other local, regional and national economic conditions.

Our results of operations are affected by new housing activity in the United States. In 2013, total housing starts increased 18%, to 0.9 million, but were still below the Historical Average of approximately 1.5 million. Based on the current level of housing activity and industry forecasts, we expect new housing activity could continue to increase into 2014, though still remain below the Historical Average.

We anticipate that fluctuations from period to period will continue in the future. Our first and fourth quarters are generally adversely affected by winter weather patterns in the Northeast, Midwest and Northwest, which typically result from seasonal decreases in levels of construction activity in these areas. Because much of our overhead and expenses remain relatively fixed throughout the year, our operating profits also tend to be lower during the first and fourth quarters. In addition, other weather patterns, such as hurricane season in the Southeast region of the United States during the third and fourth quarters, can have an adverse impact on our results in a particular period.

We depend on cash flow from operating activities and funds available under our secured credit facility to finance seasonal working capital needs, capital expenditures and any acquisitions that we may undertake. We typically generate cash from working capital reductions in the fourth quarter of the year and build working capital during the first quarter in preparation for our second and third quarters. Our working capital requirements are generally greatest in the second and third quarters, reflecting the seasonal nature of our business. The second and third quarters are also typically our strongest operating quarters, largely due to more favorable weather throughout many of our markets compared to the first and fourth quarters. We maintain significant inventories to meet the rapid delivery requirements of our customers and to enable us to obtain favorable pricing, delivery and service terms with our suppliers. At December 31, 2013 and 2012, inventories and accounts receivable in the aggregate constituted approximately 73% and 70% of our total assets, respectively. We closely monitor operating expenses and inventory levels during seasonally affected periods and, to the extent possible, manage variable operating costs to minimize the seasonal effects on our profitability.

Credit

Huttig's corporate management establishes an overall credit policy for sales to customers and then delegates responsibility for most credit decisions to regional credit personnel. Our credit policies, together with careful monitoring of customer balances, have resulted in bad debt expense of less than 0.1% of net sales in 2013 and approximately 0.1% in 2012 and 2011. Approximately 98% of our sales in 2013 were to customers to whom we had provided credit for those sales.

Backlog

Our customers generally order products on an as-needed basis. As a result, a substantial portion of product shipments in a given fiscal quarter result from orders received in that quarter. Consequently, order backlog represents only a very small percentage of the product sales that we anticipate in a given quarter and is not necessarily indicative of actual sales for any future period.

Trade Names

Historically, Huttig has operated under various trade names in the markets we serve, retaining the names of acquired businesses for a period of time to preserve local identification. To capitalize on our national presence,

all of our distribution centers operate under the primary trade name “Huttig Building Products.” Huttig has no material patents, trademarks, licenses, franchises or concessions other than the Huttig Building Products® name and logo, which are registered trademarks.

Environmental Matters

We are subject to federal, state and local environmental protection laws and regulations. We believe that we are in material compliance, or are taking action aimed at assuring material compliance, with applicable environmental protection laws and regulations. However, there can be no assurance that future environmental liabilities will not have a material adverse effect on our financial condition or results of operations.

We have been identified as a potentially responsible party in connection with the cleanup of contamination at our formerly owned property in Montana. See Part I, Item 3—“Legal Proceedings.”

In addition, some of our current and former distribution centers are located in areas of current or former industrial activity where environmental contamination may have occurred, and for which we, among others, could be held responsible. We currently believe that there are no material environmental liabilities at any of our distribution center locations.

Employees

As of December 31, 2013, we employed approximately 1,000 persons, of which approximately 14% were represented by eight unions. We have not experienced any significant strikes or other work interruptions in recent years and have maintained generally favorable relations with our employees. The Company has three union contracts which will require negotiations in 2014. See Item 1A—“Risk Factors.”

Available Information

Huttig files with the U.S. Securities and Exchange Commission quarterly and annual reports on Forms 10-Q and 10-K, respectively, current reports on Form 8-K and proxy statements pursuant to the Securities Exchange Act of 1934, in addition to other information as required. The public may read and copy our SEC filings at the SEC’s Public Reference Room at 100 F Street, N.E., Room 1580, Washington, D.C. 20549 and may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. We file this information with the SEC electronically, and the SEC maintains a website that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC at <http://www.sec.gov>.

Our website address is <http://www.huttig.com>. The contents of our website are not part of this Annual Report. We make available, free of charge at the “Investors” section of our website, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the 1934 Act. This information is available on our website as soon as reasonably practicable after we electronically file it with, or furnish it to, the SEC. Reports of beneficial ownership filed pursuant to Section 16(a) of the 1934 Act are also available on our website.

ITEM 1A—RISK FACTORS

In addition to the other information contained in this Form 10-K, the following risk factors should be considered carefully in evaluating the Company’s business. The Company’s business, financial condition or results of operations could be materially adversely affected by any of these risks. Please note that additional risks not presently known to the Company or that the Company currently deems immaterial may also impair its business and operations.

Although the homebuilding industry is recovering from a prolonged significant downturn, any further downturn or a sustained continuation of current construction levels could continue to materially affect our business, liquidity and operating results.

Our sales and results of operations depend heavily on the strength of national and local new residential construction and home improvement and remodeling markets. The strength of these markets depends on new housing starts and residential renovation projects, which are a function of many factors beyond our control. Some of these factors include general economic conditions, employment levels, job and household formation, interest rates, housing prices, tax policy, availability of mortgage financing, prices of commodity wood and steel products, immigration patterns, regional demographics and consumer confidence.

The recent downturn in the residential construction market has been one of the most severe housing downturns in U.S. history. High unemployment, tighter lending standards and general economic uncertainty have contributed to a level of housing starts below historical levels over the past several years. New housing activity in the United States has shown modest improvement each year since 2009, the trough period of the recent housing downturn. However, 2013 activity is still well below the Historical Average of approximately 1.5 million starts.

We expect the level of new housing activity in 2014 to continue to be below the Historical Average, which could adversely affect our operating results. A prolonged continuation of current construction levels or any significant downturn in the major markets we serve or in the economy in general could have a material adverse effect on our operating results, liquidity and financial condition, including but not limited to our ability to comply with the financial covenant under the credit facility and the valuation of our goodwill. Reduced levels of construction activity may result in continued intense price competition among building materials suppliers, which may adversely affect our gross margins. We cannot provide assurance that our responses to the downturn or the government's attempts to address the troubles in the economy will be successful.

The industry in which we compete is highly cyclical, and any cyclical market factors resulting in lower demand or increased supply could have a materially adverse impact on our financial results.

The building products distribution industry is subject to cyclical market pressures caused by a number of factors that are out of our control, such as general economic and political conditions, inventory levels of new and existing homes for sale, levels of new construction, home improvement and remodeling activity, interest rates and population growth. To the extent that cyclical market factors adversely impact overall demand for building products or the prices that we can charge for our products, our net sales and margins would likely decline in the same time frame as the cyclical downturn occurs. Because much of our overhead and expense is relatively fixed in nature, a decrease in sales and margin generally has a significant adverse impact on our results of operations. For example, during the past several years, our results of operations have been adversely affected by the severe downturn in new housing activity in the United States. Also, to the extent our customers experience a downturns in their business, our ability to collect our receivables could be adversely affected. Finally, the unpredictable nature of the cyclical market factors that impact our industry make it difficult to forecast our operating results.

If we are unable to meet the financial covenant under our credit facility, the lenders could elect to accelerate the repayment of the outstanding balance and, in that event, we would be forced to seek alternative sources of financing.

We are party to a \$120.0 million asset based senior secured revolving credit facility which contains a minimum fixed charge coverage ratio ("FCCR") that is tested if our excess borrowing availability, as defined in the facility, reaches an amount in the range of \$10.0 million to \$15.0 million depending on our borrowing base at the time of testing. At the time of testing, our fixed charge coverage ratio would need to exceed 1.25:1.00. As of December 31, 2013, our FCCR was in excess of 1:25:1.00. However, if in the future we failed to meet the FCCR and we were unable to maintain excess borrowing availability of more than the applicable amount in the range of \$10.0 million to \$15.0 million, our lenders would have the right, but not the obligation, to terminate the loan

commitments and accelerate the repayment of the entire amount outstanding under the credit facility. The lenders also could foreclose on our assets that secure our credit facility. In that event, we would be forced to seek alternative sources of financing, which may not be available on terms acceptable to us, or at all.

Our excess borrowing availability at December 31, 2013 was \$41.2 million. Our credit facility matures in December 2017.

Compliance with the restrictions and the financial covenant under our credit agreement will likely limit, at least in the near term, the amount available to us for borrowing under that facility and may limit management's discretion with respect to certain business matters.

The borrowings under our credit agreement are collateralized by substantially all of the Company's assets, including accounts receivable, inventory and property and equipment, and we are subject to certain operating limitations commonly applicable to a loan of this type, which, among other things, place limitations on indebtedness, liens, investments, mergers and acquisitions, dispositions of assets, cash dividends, stock repurchases and transactions with affiliates. A minimum fixed charge coverage ratio must be tested on a pro forma basis prior to consummation of certain significant business transactions outside the Company's ordinary course of business. These restrictions may limit management's ability to operate our business in accordance with management's discretion, which could limit our ability to pursue certain strategic objectives.

A significant portion of our sales are concentrated with a relatively small number of customers. A loss of one or more of these customers would have material adverse effect on our operating results, cash flow and liquidity.

In 2013, our top ten customers represented 38% of our sales, with one customer accounting for 12% of our sales. This customer is a buying group for multiple building material dealers. Although we believe that our relationships with our customers are strong, the loss of one or more of these customers could have a material adverse effect on our operating results, cash flow and liquidity.

A significant portion of our sales are on credit to our customers. Material changes in their creditworthiness or our inability to forecast deterioration in their credit position could have a material adverse effect on our operating results, cash flow and liquidity.

The majority of our sales are on account where we provide credit to our customers. In 2013, bad debt expense to total net sales was less than 0.1%. Our customers are generally susceptible to the same economic business risks as we are. Furthermore, we may not necessarily be aware of any deterioration in their financial position. If our customers' financial position becomes impaired, it could have a significant adverse impact on our bad debt exposure and could have a material adverse effect on our operating results, cash flow and liquidity.

Fluctuation in prices of commodity wood and steel products that we buy and then resell may have a significant impact on our results of operations.

Changes in wood and steel commodity prices between the time we buy these products and the time we resell them have occurred in the past, and we expect fluctuations to occur again in the future. Such changes can adversely affect the gross margins that we realize on the resale of the products. We may be unable to manage these fluctuations effectively or minimize any negative impact of these changes on our financial condition and results of operations.

The termination of key supplier relationships may have an immediate material adverse effect on our financial condition and results of operations.

We distribute building materials that we purchase from a number of major suppliers. As is customary in our industry, most of our relationships with these suppliers are terminable without cause on short notice. Slightly

more than half of our purchases are concentrated with ten suppliers. Although we believe that relationships with our existing suppliers are strong and that in most cases we would have access to similar products from competing suppliers, the termination of key supplier relationships or any other disruption in our sources of supply, particularly of our most commonly sold items, could have a material adverse effect on our financial condition and results of operations. Supply shortages resulting from unanticipated demand or production difficulties could occur from time to time and could have a material adverse effect on our financial condition and results of operations.

The building materials distribution industry is fragmented and competitive, and we may not be able to compete successfully with some of our existing competitors or new entrants in the markets we serve.

The building materials distribution industry is fragmented and competitive. Our competition varies by product line, customer classification and geographic market. The principal competitive factors in our industry are:

- pricing and availability of product;
- service and delivery capabilities;
- ability to assist with problem-solving;
- customer relationships;
- geographic coverage; and
- breadth of product offerings.

Also, financial stability is important to manufacturers and customers in choosing distributors for their products.

We compete with many local, regional and, in some markets and product categories, national building materials distributors and dealers. In addition, some product manufacturers sell and distribute their products directly to our customers, and the volume of such direct sales could increase in the future. Manufacturers of products distributed by us may also enter into exclusive supplier arrangements with our competition. Further, home center retailers, which have historically concentrated their sales efforts on retail consumers and small contractors, may intensify their marketing efforts to larger contractors and homebuilders. Some of our competitors have greater financial and other resources and may be able to withstand sales or price decreases better than we can. We also expect to continue to face competition from new market entrants. We may be unable to continue to compete effectively with these existing or new competitors, which could have a material adverse effect on our financial condition and results of operations.

We have retained accident and claims risk under our insurance programs. Significant claims, and/or our ability to accurately estimate the liability for these claims could have a material adverse effect on our operating results.

We retain a portion of the accident and claims risk under vehicle liability, workers' compensation, medical and other insurance programs. We have multiple claims of various sizes and forecast the number of claims in determining the portion of accident risk we are willing to self insure. We base loss accruals on our best estimate of the cost of resolution of these matters and adjust them periodically as circumstances change. Due to limitations inherent in the estimation process, our estimates may change. Changes in the actual number of large claims or changes in the estimates of these accruals may have a material adverse affect on our results of operations in any such period.

In addition, our insurance underwriters require collateral, generally in the form of letters of credit, which reduce our borrowing availability under our senior secured credit facility. Changes in the actual number of large claims could increase our collateral requirements and reduce our borrowing availability under our credit facility.

Federal and state transportation regulations, as well as increases in the cost of fuel, could impose substantial costs on us, which could adversely affect our results of operations.

We use our own fleet of approximately 150 tractors, 20 trucks and 320 trailers to service customers throughout the United States. The U.S. Department of Transportation, or DOT, regulates our operations, and we are subject to safety requirements prescribed by the DOT. Vehicle dimensions and driver hours of service also are subject to both federal and state regulation. More restrictive limitations on vehicle weight and size, trailer length and configuration, or driver hours of service could increase our costs.

In addition, distributors are inherently dependent upon energy to operate and, therefore, are impacted by changes in diesel fuel prices. The cost of fuel has reached historically high levels during portions of the last three years, is largely unpredictable and has a significant impact on the Company's results of operations. Fuel availability, as well as pricing, is also impacted by political and economic factors. It is difficult to predict the future availability of fuel due to the following factors, among others: dependency on foreign imports of crude oil and the potential for hostilities or other conflicts in oil producing areas; limited refining capacity; and the possibility of changes in governmental policies on fuel production, transportation and marketing. Significant disruptions in the supply of fuel could have a negative impact on fuel prices and thus the Company's operations and results of operations.

Our failure to attract and retain key personnel could have a material adverse effect on our future success.

Our future success depends, to a significant extent, upon the continued service of our executive officers and other key management and sales personnel and on our ability to continue to attract, retain and motivate qualified personnel. The loss of the services of one or more key employees or our failure to attract, retain and motivate qualified personnel could have a material adverse effect on our business.

A number of our employees are unionized, and any work stoppages by our unionized employees may have a material adverse effect on our results of operations.

Approximately 14% of our employees are represented by labor unions as of December 31, 2013. As of December 31, 2013, we had eight collective bargaining agreements. The Company has three union contracts which will require negotiations in 2014. We may become subject to significant wage increases or additional work rules imposed by future agreements with labor unions representing our employees. Any such cost increases or new work rule implementation could increase our operating expenses to a material extent. In addition, although we have not experienced any strikes or other significant work interruptions in recent years and have maintained generally favorable relations with our employees, no assurance can be given that there will not be any work stoppages or other labor disturbances in the future, which could adversely impact our financial results.

Our unionized employees generally participate in certain multi-employer pension plans and funding requirements for these plans, particularly underfunded plans, may have a material adverse effect on our results of operations.

We participate in various multi-employer pension plans. Some of these multi-employer plans may be underfunded at any point in time. While the underfunded status may be cured in the normal course of plan management, a significant obligation may be created which could have a material adverse effect on our operations or could impact our decision to close or consolidate certain operating locations.

We face the risks that product liability claims and other legal proceedings relating to the products we distribute may adversely affect our business and results of operations.

As is the case with other companies in our industry, even though our suppliers generally warrant the products we sell, we face the risk of product liability and other claims of the type that are typical to our industry in the event that the use of products that we have distributed causes other damages. Product liability claims in the

future, regardless of their ultimate outcome and whether or not covered under our insurance policies or indemnified by our suppliers, could result in costly litigation and have a material adverse effect on our business and results of operations.

We may acquire other businesses, and, if we do, we may be unable to integrate them with our business, which may impair our financial performance.

If we find appropriate opportunities, we may acquire businesses that we believe provide strategic opportunities. If we acquire a business, the process of integration may produce unforeseen operating difficulties and expenditures and may absorb significant attention of our management that would otherwise be available for the ongoing development of our business. If we make future acquisitions, we may issue shares of stock that dilute other stockholders, expend cash, incur debt, assume contingent liabilities or create additional expenses relating to amortizing intangible assets with estimated useful lives, any of which might harm our business, financial condition or results of operations.

We face risks of incurring significant costs to comply with environmental regulations.

We are subject to federal, state and local environmental protection laws and regulations and may have to incur significant costs to comply with these laws and regulations in the future. We have been identified as a potentially responsible party in connection with the cleanup of contamination at a formerly owned property in Montana, where we are voluntarily remediating the property under the oversight of the Montana Department of Environmental Quality (Montana DEQ). Until the Montana DEQ selects and orders us to implement a final remedy, we can give no assurance as to the scope or cost to us of any final remediation order. In addition, some of our current and former distribution centers are located in areas of current or former industrial activity where environmental contamination may have occurred, and for which we, among others, could be held responsible. As a result, we may incur material environmental liabilities in the future with respect to our current or former distribution center locations.

Goodwill is a significant portion of our total assets and is tested for impairment at least annually, which could result in a material non-cash write-down of goodwill.

Goodwill is subject to impairment tests at least annually and between annual tests in certain circumstances. We have incurred non-cash impairment charges in certain prior years, for example, during 2012 we recorded non-cash impairment charges of goodwill of \$1.9 million primarily related to a reduction in fair value of one reporting unit as a result of the continuing downturn in the residential construction and real estate markets. At December 31, 2013, we had goodwill assets of \$6.3 million. We may be required to incur additional non-cash impairment charges in the future that could have a material adverse effect on our operating results.

Our financial results reflect the seasonal nature of our operations.

Our first quarter and our fourth quarter revenues are typically adversely affected by winter construction cycles and weather patterns in colder climates as the level of activity in the new construction and home improvement markets decreases. Because much of our overhead and expense remains relatively fixed throughout the year, our operating profits also tend to be lower during the first and fourth quarters. In addition, other weather patterns, such as hurricane season in the Southeast region of the United States during the third and fourth quarters, can have an adverse impact on our profits in a particular period.

ITEM 1B—UNRESOLVED STAFF COMMENTS

None.

ITEM 2—PROPERTIES

Our corporate headquarters is located at 555 Maryville University Drive, Suite 400, St. Louis, Missouri 63141, in a leased facility. We own 13 of our distribution centers and lease the balance. Warehouse space at

distribution centers aggregated to approximately 3.2 million square feet as of December 31, 2013. Distribution centers range in size from 21,100 square feet to 260,000 square feet. The types of facilities at these centers vary by location, from traditional wholesale distribution warehouses to facilities with broad product offerings and capabilities for a wide range of value added services such as pre-hung door operations. We believe that our locations are well maintained and adequate for their purposes.

ITEM 3—LEGAL PROCEEDINGS

We are involved in various claims and litigation arising principally in the ordinary course of business. We believe that the disposition of these matters will not have a material adverse effect on our business or our financial condition.

We are subject to federal, state and local environmental protection laws and regulations. We believe that we are in compliance, or are taking action aimed at assuring compliance, with applicable environmental protection laws and regulations. However, there can be no assurance that future environmental liabilities will not have a material adverse effect on our financial condition or results or operations.

Environmental Matters

In 1995, Huttig was identified as a potentially responsible party in connection with the cleanup of contamination at a formerly owned property in Montana that was used for the manufacture of wood windows. We are voluntarily remediating this property under the oversight of and in cooperation with the Montana Department of Environmental Quality (Montana DEQ) and are complying with a 1995 unilateral administrative order of the Montana DEQ to complete a remedial investigation and feasibility study. The remedial investigation was completed by Huttig and approved in 1998 by the Montana DEQ, which has also issued its final risk assessment of this property. Since 1998 we have remained in active discussions with the Montana DEQ, expanded the remedial investigation where warranted, implemented voluntary interim cleanup actions, conducted pilot tests, and tested remedial technologies in the field. We are currently working with the Montana DEQ to develop a final feasibility study which will present and evaluate several potential remedies. The Montana DEQ is ultimately expected to publicize a final remedy for public comment. After consideration of public comments, the Montana DEQ will then publish a record of decision and negotiate with Huttig for an administrative order of consent on the implementation of the final remedy. We spent less than \$0.5 million on costs related to this site in each of the years ended December 31, 2013, 2012 and 2011. The annual level of future remediation expenditures is difficult to estimate because of the uncertainty relating to the final remedy to be selected by the Montana DEQ. As of December 31, 2013, we have accrued \$0.6 million for future costs of remediating this site, which management believes represents a reasonable estimate based on current facts and circumstances and the currently expected costs of remediation. Until the Montana DEQ selects a final remedy, however, management cannot estimate the top of the range of loss or cost to Huttig of the final remediation order. As a result, we may incur material adverse effect on the consolidated financial statements in the future with respect to this property.

In addition, some of our current and former distribution centers are located in areas of current or former industrial activity where environmental contamination may have occurred, and for which we, among others, could be held responsible. We currently believe that there are no material environmental liabilities at any of our distribution center locations.

ITEM 4—MINE SAFETY DISCLOSURES

Not Applicable.

PART II

ITEM 5—MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Through December 6, 2013, our common stock traded over the counter under the symbol “HBPL.PK”. Effective December 9, 2013, our common stock began trading on the NASDAQ Capital Market exchange under the symbol “HBP”.

At February 10, 2014, there were approximately 1,800 holders of record of our common stock. The following table sets forth the range of high and low sale prices of our common stock:

	2013		2012	
	High	Low	High	Low
First Quarter	\$3.00	\$1.30	\$1.55	\$0.52
Second Quarter	3.00	2.00	1.50	0.63
Third Quarter	2.89	2.11	1.60	1.05
Fourth Quarter	3.96	2.40	1.67	1.10

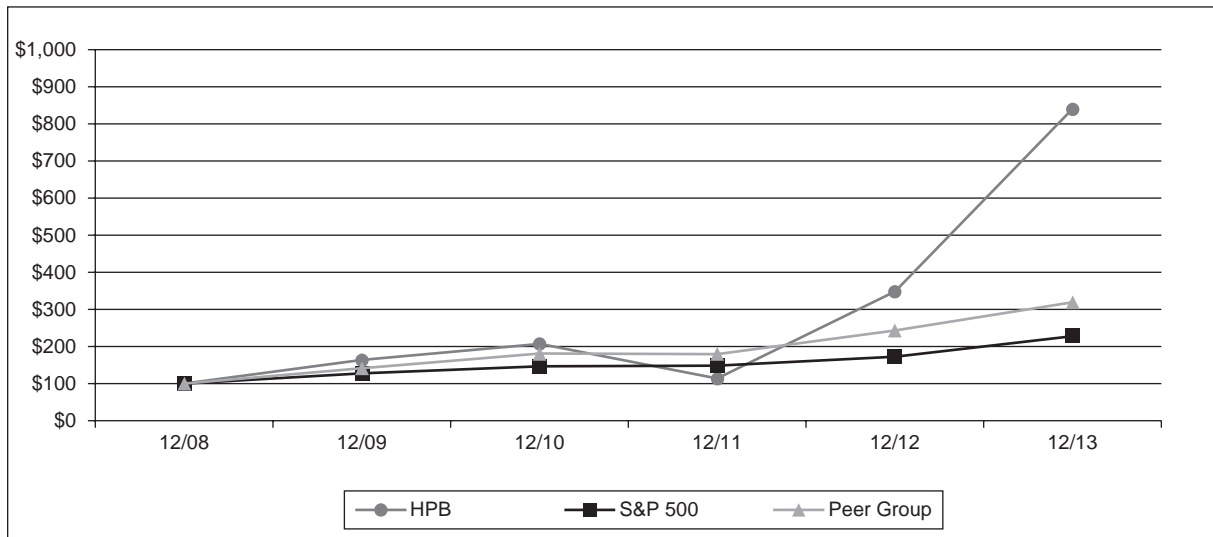

In order to make cash generated available for use in operations, debt reduction, stock repurchases and potential acquisitions, we have never declared, nor do we anticipate at this time declaring or paying, any cash dividends on our common stock. Provisions of our credit facility contain various covenants, which, among other things, limit our ability to incur indebtedness, incur liens, make certain types of acquisitions, declare or pay dividends or sell assets. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources.”

See Part III, Item 12, for information on securities authorized for issuance under equity compensation plans.

Performance Graph

The following Performance Graph and related information shall not be deemed “soliciting material” or to be “filed” with the Securities and Exchange Commission, nor shall such information be incorporated by reference into any future filing under the Securities Act of 1933 or Securities Exchange Act of 1934, each as amended, except to the extent that the Company specifically incorporates it by reference into such filing.

The following table compares total shareholder returns for the Company over the last five years to the Standard and Poor’s 500 Stock Index and that of a peer group made up of other building material and industrial products distributors assuming a \$100 investment made on December 31, 2008. Each of the three measures of cumulative total return assumes reinvestment of dividends. The stock performance shown on the graph below is not necessarily indicative of future price performance.

	<u>Huttig Building Products</u>	<u>S&P 500</u>	<u>Peer Group Index</u>
12/08	\$100.00	\$100.00	\$100.00
12/09	\$163.04	\$126.46	\$141.41
12/10	\$206.52	\$145.51	\$180.27
12/11	\$113.04	\$148.58	\$179.83
12/12	\$347.83	\$172.35	\$242.86
12/13	\$839.13	\$228.18	\$319.06

(1) The peer group includes the following companies: QEP Co., Watsco Inc., Bluelinx Holdings, Inc. and Universal Forest Products, Inc.

ITEM 6—SELECTED CONSOLIDATED FINANCIAL DATA

The following table summarizes certain selected financial data of continuing operations of Huttig for each of the five years in the period ended December 31, 2013. The information contained in the following table may not necessarily be indicative of our future performance. Such historical data should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our consolidated financial statements and notes thereto included elsewhere in this report.

	Year Ended December 31,				
	2013	2012	2011	2010	2009
	(In Millions, Except Per Share Data)				
Income Statement Data:(1)					
Net sales	\$561.5	\$521.1	\$479.3	\$467.7	\$455.2
Cost of sales	450.4	420.4	390.1	382.5	371.1
Gross margin	111.1	100.7	89.2	85.2	84.1
Operating expenses	104.8	98.4	99.0	103.3	105.7
Goodwill impairment	—	1.9	0.4	—	1.0
Gain on disposal of capital assets	—	(2.4)	—	(0.4)	(1.5)

Income (loss) from continuing operations before income taxes	3.7	(0.1)	(13.0)	(19.8)	(22.6)
Provision (benefit) for income taxes	0.1	—	(0.3)	(0.4)	(2.8)
Net income (loss) from continuing operations	3.6	(0.1)	(12.7)	(19.4)	(19.8)
Per share:					
Net income (loss) from continuing operations (basic and diluted)	0.15	—	(0.58)	(0.90)	(0.94)
Balance Sheet Data (at end of year):					
Total assets	151.0	137.5	126.5	126.1	136.2
Debt—bank, capital leases and other obligations(2)	62.0	59.8	52.6	42.1	35.4
Total shareholders’ equity	22.9	19.1	19.9	32.6	50.7

(1) Amounts exclude operations classified as discontinued.

(2) Debt includes both current and long-term portions of bank debt, capital leases and other obligations. See Note 4 to our consolidated financial statements.

ITEM 7—MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

Huttig is a distributor of building materials used principally in new residential construction and in home improvement, remodeling and repair work. We distribute our products through 27 distribution centers serving 41 states and sell primarily to building materials dealers, national buying groups, home centers and industrial users, including makers of manufactured homes. Our products fall into three categories: (i) millwork, which includes doors, windows, moulding, stair parts and columns, (ii) general building products, which include composite decking, connectors, fasteners, housewrap, roofing products and insulation, and (iii) wood products, which include engineered wood products, such as floor systems, as well as wood panels and lumber.

Industry Conditions

Our sales depend heavily on the strength of local and national new residential construction, home improvement and remodeling markets. During the past several years, our results of operations have been adversely affected by the severe downturn in new housing activity in the United States. However, new housing activity has shown moderate improvement each year since 2009, the trough period of the downturn. In 2013, total housing starts increased 18%, to 0.9 million, but were still below the Historical Average of approximately 1.5 million. Based on the current level of housing activity and industry forecasts, we expect the increase in new housing activity could continue into 2014 but still remain below the Historical Average.

Various factors historically have caused our results of operations to fluctuate from period to period. These factors include levels of construction, home improvement and remodeling activity, weather, prices of commodity wood and steel products, interest rates, competitive pressures, availability of credit and other local, regional, national and economic conditions. Many of these factors are cyclical or seasonal in nature. We anticipate that further fluctuations in operating results from period to period will continue in the future. Our first quarter and fourth quarter are generally adversely affected by winter weather patterns in the Midwest and Northeast, which typically result in seasonal decreases in levels of construction activity in these areas. Because much of our overhead and expenses remain relatively fixed throughout the year, our operating profits tend to be lower during the first and fourth quarters.

We believe we have the product offerings, distribution channel, personnel, systems infrastructure and financial and competitive resources necessary for continued operations. Our future revenues, costs and profitability, however, are all likely to be influenced by a number of risks and uncertainties, including those in Item 1A—RISK FACTORS.

Critical Accounting Policies

We prepare our consolidated financial statements in accordance with U.S. generally accepted accounting principles, which require management to make estimates and assumptions. Management bases these estimates and assumptions on historical results and known trends as well as management forecasts. Actual results could differ from these estimates and assumptions.

Accounts Receivable—Trade accounts receivable consist of amounts owed for orders shipped to customers and are stated net of an allowance for doubtful accounts. Huttig’s corporate management establishes an overall credit policy for sales to customers and delegates responsibility for most credit decisions to regional credit personnel. The allowance for doubtful accounts is determined based on a number of factors including when customer accounts exceed 90 days past due and specific customer account reviews. Our credit policies, together with careful monitoring of customer balances, have resulted in bad debt expense of less than 0.1% of net sales in 2013 and approximately 0.1% in 2012 and 2011.

Inventory—Inventories are valued at the lower of cost or market. We utilize the LIFO cost method to value the majority of our inventories. We review inventories on hand and record a provision for slow-moving and obsolete inventory based on historical and expected sales.

Valuation of Goodwill and Other Long-Lived Assets—We test the carrying value of our goodwill at each reporting unit for impairment on an annual basis and between annual tests in certain circumstances when there are indicators of potential impairment. The carrying value of goodwill is considered impaired when a reporting unit's fair value is less than its carrying value. We also reassess useful lives of previously recognized intangible assets. For goodwill, we first assess the qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. In that event, goodwill impairment is recognized to the extent recorded goodwill exceeds the implied fair value of that goodwill. Circumstances that can lead to annual or interim two-step goodwill testing include significant negative variances from forecasted sales or operating profits or changes in other circumstances that indicate the carrying amount of goodwill may not be recoverable. We utilize a discounted cash flows model to estimate fair value of a reporting unit. In our estimate of fair value of a reporting unit, the following significant assumptions, and changes therein, are considered:

- publicly available and internal projections of single and multi-family housing starts used to project a reporting unit's revenue in future years;
- the reporting unit's gross margin and operating expenses that reflect cost reduction actions already taken by the Company;
- projected variable costs associated with the variable revenue streams projected in the future;
- projected reporting unit working capital changes and capital expenditure requirements; and
- an estimate of a discount rate commensurate with the weighted average cost of capital for a market participant and a related growth factor.

At December 31, 2013, we had \$6.3 million of goodwill recorded across 14 reporting units. Significant changes in our assumptions and the related projected cash flows utilized in calculating the reporting unit's fair value could result in future goodwill impairment related to any of our reporting units. In 2012, we recorded goodwill impairment of \$1.9 million related to the reduction in fair value of one reporting unit.

We test the carrying value of other long-lived assets, including intangible and other tangible assets, for impairment when events and circumstances warrant such review. The carrying value of long-lived assets is considered impaired when the anticipated undiscounted cash flows from such assets are less than the carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair value of the long-lived asset.

Contingencies—We accrue expenses when it is probable that an asset has been impaired or a liability has been incurred and we can reasonably estimate the expense. Contingencies for which we have made accruals include environmental, product liability and certain other legal matters. It is possible that future results of operations for any particular quarter or annual period and our financial condition could be materially affected by changes in assumptions or other circumstances related to these matters. We accrue an estimate of the cost of resolution of these matters and make adjustments to the amounts accrued as circumstances change. We expense legal costs as incurred.

Self-Insurance—It is our policy to self-insure, up to certain limits, traditional risks including workers' compensation, comprehensive general liability, physical loss to property and auto liability. We are also self-insured, up to certain limits, for certain other insurable risks, including the majority of our medical benefit plans. Insurance coverage is maintained for catastrophic property and casualty exposures as well as those risks required to be insured by law or contract. A provision for self-insured claims, based on our estimate of the aggregate liability for claims incurred, is revised and recorded quarterly. The estimates are derived from both internal and external sources, including but not limited to actuarial type estimates, claims incurred, the probability of losses and historical settlement experience. Our estimates are subject to uncertainty from various sources, including, among others, changes in claim reporting patterns, claim settlement patterns, judicial decisions, legislation and economic conditions. Although we believe our estimates are reasonable, significant differences related to the items noted above could materially affect our self-insurance obligations, future expense and cash flow.

Income Taxes—We operate within multiple taxing jurisdictions and are subject to audit in these jurisdictions. These audits can involve complex issues, which may require an extended period of time to resolve. We regularly review our potential tax liabilities for tax years subject to audit. Changes in our tax liability may occur in the future as our assessment changes based on the progress of tax examinations in various jurisdictions and/or changes in tax regulations. In management’s opinion, adequate provisions for income taxes have been made for all years presented.

Deferred tax assets and liabilities are recognized for the future tax benefits or liabilities attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates would be recognized in income in the period that includes the enactment date. We regularly review our deferred tax assets for recoverability and establish a valuation allowance when we believe that such assets may not be recovered, taking into consideration historical operating results, expectations of future earnings, changes in operations, the expected timing of the reversal of existing temporary differences and available tax planning strategies. Currently, our deferred tax liabilities, which reverse in the same periods and jurisdictions as our deferred tax assets, enable us to partially utilize the deferred tax assets at December 31, 2013, without relying on any projections of future pre-tax income. The balance of these deferred tax assets are covered by a valuation allowance.

Results of Operations

Fiscal 2013 Compared to Fiscal 2012

Continuing Operations

Net sales from continuing operations were \$561.5 million in 2013, which were \$40.4 million, or approximately 8%, higher than 2012. This increase is primarily due to continued improvement in new residential construction activity along with modest increases in repair and remodel spend, partially offset by a decline in certain storm driven roofing sales.

Sales in the major product categories changed as follows in 2013 from 2012: millwork sales increased 15% to \$278.1 million, building product sales declined 2% to \$215.4 million, and wood products increased 15% to \$68.0 million with a 52% increase in sales of engineered wood products and a 3% increase in sales of other wood products. The decline in building product sales was primarily due to the decrease in our roofing business, which is partially storm driven. Fluctuations across product categories can occur based on general market conditions, new product incentives, promotions, changes in product lines, and commodity pricing, among other things.

Gross margin increased approximately 10% to \$111.1 million, or 19.8% of sales, in 2013 as compared to \$100.7 million, or 19.3% of sales, in 2012. The higher margin percentage in 2013 reflects changes in the product mix coupled with a concerted effort to increase margins. The pricing environment remains very competitive, which continues to have a mitigating effect on margins.

Operating expenses increased \$6.4 million to \$104.8 million, or 18.7% of sales, in 2013, compared to \$98.4 million, or 18.9% of sales, in 2012. The increase in operating expenses is primarily due to an increase in personnel costs, which increased \$5.8 million, principally from increased headcount, general widespread wage increases implemented in 2013, as well as higher variable costs associated with increased sales. We recorded total stock-based compensation expense of \$1.0 million in 2013 compared to \$0.8 million in 2012. Non personnel expenses were \$0.6 million higher in 2013 as compared to 2012.

Our results for the year ended December 31, 2012 included a gain on disposal of capital assets of \$2.4 million, primarily from the sale of a previously closed facility. In addition, our results for 2012 included a goodwill impairment charge of \$1.9 million.

Net interest expense was \$2.6 million in 2013 compared to \$2.9 million in 2012. The decrease is primarily due to lower borrowing rates in 2013 versus 2012.

Income tax expense of \$0.1 million was recognized for the period ending December 31, 2013. No income tax expense or benefit was recognized for the period ending December 31, 2012.

If, in the future, we generate sufficient earnings in federal and state tax jurisdictions where we have recorded valuation allowances, our conclusion regarding the need for a valuation allowance in these tax jurisdictions could change. Accordingly, it is reasonably possible we could have a reduction of some or a significant portion of our recorded valuation allowance of \$30.1 million at December 31, 2013. This determination would be dependent on a number of factors which would include, but not be limited to, our expectation of future taxable income.

As a result of the foregoing factors, we reported income from continuing operations of \$3.6 million in 2013 as compared to a loss from continuing operations of \$0.1 million in 2012.

Discontinued Operations

We recorded a loss of \$0.4 million from discontinued operations in both 2013 and 2012. The loss in both years is due to environmental and related legal expenses.

Fiscal 2012 Compared to Fiscal 2011

Continuing Operations

Net sales from continuing operations were \$521.1 million in 2012, which were \$41.8 million, or approximately 9%, higher than 2011. This increase is primarily due to higher levels of new residential construction activity along with modest increases in repair and remodel spend, partially offset by a decline in certain storm driven roofing sales.

Sales in the major product categories changed as follows in 2012 from 2011: millwork sales increased 13% to \$242.5 million, building product sales increased 4% to \$219.6 million, and wood products increased 10% to \$59.0 million with a 23% increase in sales of engineered wood products and a 7% increase in sales of other wood products. The increase in building product sales was partially offset by the decrease in our roofing business, which is partially storm driven. Fluctuations across product categories can occur based on new product incentives, promotions, changes in product lines, commodity pricing and weather, among other things.

Gross margin increased approximately 13% to \$100.7 million, or 19.3% of sales, in 2012 as compared to \$89.2 million, or 18.6% of sales, in 2011. The higher margin percentage in 2012 reflects changes in the product mix coupled with a concerted effort to increase margins. In 2012 and 2011, gross margins continued to be negatively impacted by competitive pricing pressure in the down housing market.

Operating expenses decreased \$0.6 million to \$98.4 million, or 18.9% of sales, in 2012, compared to \$99.0 million, or 20.7% of sales, in 2011. Personnel costs increased slightly as benefits from general widespread wage reductions instituted in December 2011 were offset by higher variable incentive compensation from improved operating results as well as increased medical costs. Non personnel expenses were lower in 2012 as compared to 2011 as benefits from continued cost control efforts were recognized across various general expense categories. We recorded total stock-based compensation expense of \$0.8 million in 2012 compared to \$0.5 million in 2011.

Our results for the year ended December 31, 2012 included a gain on disposal of capital assets of \$2.4 million, primarily from the sale of a previously closed facility. In addition, our results for 2012 and 2011 included goodwill impairment charges of \$1.9 million and \$0.4 million, respectively.

Net interest expense was \$2.9 million in 2012 compared to \$2.8 million in 2011 primarily due to higher average debt outstanding in 2012 versus 2011.

No income tax expense or benefit was recognized for the period ending December 31, 2012. Income tax benefit as a percentage of pre-tax loss for 2011 was approximately 2%. In 2011, a \$0.3 million tax benefit in continued operations was recognized from a reduction in liabilities related to uncertain tax positions.

As a result of the foregoing factors, we incurred a loss from continuing operations of \$0.1 million in 2012 as compared to a loss from continuing operations of \$12.7 million in 2011.

Discontinued Operations

We recorded a loss of \$0.4 million from discontinued operations in 2012 compared to loss of \$0.5 million in 2011. The loss in both years is due to environmental and related legal expenses.

Liquidity and Capital Resources

We depend on cash flow from operations and funds available under our revolving credit facility to finance seasonal working capital needs, capital expenditures and any acquisitions that we may undertake. Our working capital requirements are generally greatest in the second and third quarters, which reflect the seasonal nature of our business. The second and third quarters are also typically our strongest operating quarters, largely due to more favorable weather throughout many of our markets compared to the first and fourth quarters. We typically generate cash from working capital reductions in the fourth quarter of the year and build working capital during the first quarter in preparation for our second and third quarters. We also maintain significant inventories to meet rapid delivery requirements of our customers and to enable us to obtain favorable pricing, delivery and service terms with our suppliers. At December 31, 2013 and 2012, inventories and accounts receivables constituted approximately 73% and 70% of our total assets, respectively. We also closely monitor operating expenses and inventory levels during seasonally affected periods and, to the extent possible, manage variable operating costs to minimize seasonal effects on our profitability.

Operations—Cash provided by operating activities improved by \$5.5 million to \$1.2 million in 2013, compared to a \$4.3 million usage of cash in 2012. In 2013, our net income increased \$3.7 million compared to 2012. Accounts receivable increased by \$2.1 million and \$2.3 million during 2013 and 2012, respectively. Days sales outstanding (“DSO”) decreased by 0.7 days to 29.6 days at December 31, 2013 from 30.3 days at December 31, 2012 based on annualized fourth quarter sales and quarter ended accounts receivable balances for the respective periods. Inventory increased by \$11.7 million in 2013 compared to an increase of \$10.2 million in 2012. Our inventory turns decreased to 6.7 turns in 2013 from 7.3 turns in 2012. The increase in inventories at December 31, 2013, is principally due to the inventory build of the Azek decking and trim lines, which the company added in the fourth quarter of 2013, as well as purchases made under other advance buy arrangements and to support anticipated sales growth. Accounts payable increased by \$9.1 million during 2013 compared to a \$2.9 million increase in the year ago period. The increase in accounts payable is generally due to the timing of payments and the higher inventory levels at December 31, 2013. Days payable outstanding increased to 34.2 at December 31, 2013 from 28.1 at December 31, 2012 based on annualized fourth quarter costs of goods sold and quarter end accounts payable balances for the respective periods.

Investing—Net cash used in investing activities was \$2.2 million in 2013, as compared to \$1.4 million net cash provided by investing activities in 2012. In 2013, we invested \$2.2 million in machinery and equipment at various locations. In 2012, we invested \$1.9 million in machinery and equipment at various locations and received \$3.3 million in proceeds from the sale of certain real estate from a previously closed facility.

Financing—Cash used in financing activities of \$0.7 million in 2013 reflects net debt borrowings of \$0.7 million under our credit facility, less payments of \$1.0 million for capital lease and other debt obligations, less

\$0.4 million for the repurchase of 0.2 million shares of common stock in conjunction with the administration of our 2005 Executive Incentive Compensation Plan. The shares repurchased were retired. Cash provided from financing of \$4.5 million in 2012 reflects net debt borrowings of \$6.3 million under our credit facility, less payments of \$0.7 million for our capital lease and other debt obligations. In addition, in 2012, we repurchased 1.0 million shares of our common stock in a private transaction for \$1.1 million.

Credit Facility—We have a \$120.0 million asset based senior secured revolving credit facility (“credit facility”). Borrowing availability under the credit facility is based on eligible accounts receivable, inventory and real estate. The real estate component of the borrowing base amortizes monthly over 12.5 years on a straight-line basis. Borrowings under the credit facility are collateralized by substantially all of our assets and are subject to certain operating limitations applicable to a loan of this type, which, among other things, place limitations on indebtedness, liens, investments, mergers and acquisitions, dispositions of assets, cash dividends and transactions with affiliates. The entire unpaid balance under the credit facility is due and payable on December 21, 2017, the maturity date of the credit agreement.

At December 31, 2013, under the credit facility, we had revolving credit borrowings of \$59.8 million outstanding at a weighted average interest rate of 2.85%, letters of credit outstanding totaling \$3.6 million, primarily for health and workers’ compensation insurance, and \$41.2 million of additional committed borrowing capacity. We pay an unused commitment fee in the range of 0.30% to 0.375% per annum. In addition, we had \$2.2 million of capital lease and other obligations outstanding at December 31, 2013.

The sole financial covenant in the credit facility is the fixed charge coverage ratio (“FCCR”) which must be tested by us if the excess borrowing availability falls below an amount in the range of \$10.0 million to \$15.0 million, depending on our borrowing base, and must also be tested on a pro forma basis prior to consummation of certain significant business transactions outside our ordinary course of business, as defined in the agreement. At December 31, 2013, our FCCR was in excess of the 1.25:1.00 covenant requirement. We had \$41.2 million of excess borrowing availability at December 31, 2013.

We believe that cash generated from our operations and funds available under the credit facility will provide sufficient funds to meet the operating needs of the business for at least the next twelve months. However, if our availability falls below the required threshold and we do not meet the minimum FCCR, our lenders would have the right, but not the obligation, to terminate the loan commitments and accelerate the repayment of the entire amount outstanding under the credit facility. The lenders could also foreclose on our assets that secure the credit facility. In that event, we would be forced to seek alternative sources of financing, which may not be available on terms acceptable to us, or at all.

Off-Balance Sheet Arrangements

In addition to funds available from operating cash flows and our bank credit facility as described above, we use operating leases as a principal off balance sheet technique. Operating leases are employed as an alternative to purchasing certain property, plant and equipment. Future rental commitments, extending through the year 2020, under all non-cancelable operating leases in effect at December 31, 2013 total \$36.6 million.

Commitments and Contingencies

The table below summarizes our contractual obligations as of December 31, 2013 (in millions):

	Total	Payments Due by Period			
		2014	2015-2016	2017-2018	Beyond 2018
Long-term debt, including current portion (1)	\$62.0	\$ 1.2	\$ 0.7	\$60.1	\$—
Operating lease obligations (2)	36.6	8.8	15.9	9.0	2.9
Total	<u>\$98.6</u>	<u>\$10.0</u>	<u>\$16.6</u>	<u>\$69.1</u>	<u>\$ 2.9</u>

-
- (1) Amounts represent the expected cash payments of our long-term debt and do not include any fair value adjustments.
 - (2) Amounts, are net of minimum sublease income

Cautionary Statement Relevant to Forward-looking Information for the Purpose of “Safe Harbor” Provisions of the Private Securities Litigation Reform Act of 1995

This Annual Report on Form 10-K and our annual report to stockholders contain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. The words or phrases “will likely result,” “are expected to,” “will continue,” “is anticipated,” “believe,” “estimate,” “project” or similar expressions may identify forward-looking statements, although not all forward-looking statements contain such words. Statements made in this Annual Report on Form 10-K and our annual report to stockholders looking forward in time, including, but not limited to, statements regarding the Company’s current views with respect to financial performance, future growth in the housing market, distribution channels, sales, favorable supplier relationships, inventory levels, the ability to meet customer needs, enhanced competitive posture, no material financial impact from litigation or contingencies, are included pursuant to the “safe harbor” provision of the Private Securities Litigation Reform Act of 1995.

These statements present management’s expectations, beliefs, plans and objectives regarding our future business and financial performance. These forward-looking statements are based on current projections, estimates, assumptions and judgments, and involve known and unknown risks and uncertainties. We disclaim any obligation to publicly update or revise any of these forward-looking statements, whether as a result of new information, future events or otherwise. There are a number of factors that could cause our actual results to differ materially from those expressed or implied in the forward-looking statements. These factors include, but are not limited to those set forth under Item 1A-Risk Factors.

ITEM 7A—QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have exposure to market risk as it relates to effects of changes in interest rates. We had debt outstanding at December 31, 2013 under our credit facility of \$59.8 million.

All of our debt under our revolving credit facility accrues interest at a floating rate basis. If market interest rates for LIBOR had been different by an average of 1% for the year ended December 31, 2013, our interest expense and income before taxes would have changed by \$0.7 million. These amounts are determined by considering the impact of the hypothetical interest rates on our borrowing cost. This analysis does not consider the effects of any change in the overall economic activity that could exist in such an environment. Further, in the event of a change of such magnitude, management may take actions to further mitigate its exposure to the change. However, due to the uncertainty of the specific actions that would be taken and their possible effects, the sensitivity analysis assumes no changes in our financial structure.

We are subject to periodic fluctuations in the price of wood, steel commodities, petrochemical-based products and fuel. Profitability is influenced by these changes as prices change between the time we buy and sell the wood, steel or petrochemical-based products. Profitability is influenced by changes in prices of fuel. In addition, to the extent changes in interest rates affect the housing and remodeling market, we would be affected by such changes.

ITEM 8—FINANCIAL STATEMENTS AND SUPPLEMENTAL DATA

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Huttig Building Products, Inc.:

We have audited the accompanying consolidated balance sheets of Huttig Building Products, Inc. and subsidiary (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Huttig Building Products, Inc. and subsidiary as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

HUTTIG BUILDING PRODUCTS, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2013, 2012 AND 2011

(In Millions, Except Share and Per Share Data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND PROCEDURES

Organization—Huttig Building Products, Inc. and subsidiary (the “Company” or “Huttig”) is a distributor of building materials used principally in new residential construction and in home improvement, remodeling and repair work. Huttig’s products are distributed through 27 distribution centers serving 41 states and are sold primarily to building materials dealers, national buying groups, home centers and industrial users including makers of manufactured homes.

Principles of Consolidation—The consolidated financial statements include the accounts of Huttig Building Products, Inc. and its wholly owned subsidiary. All significant inter-company accounts and transactions have been eliminated.

Reclassifications—Certain prior year amounts have been reclassified to conform to the current year presentation.

Revenue Recognition—Revenues are recorded when title passes to the customer, which occurs upon delivery of product, less an allowance for returns, customer rebates and discounts for early payments. Returned products for which the Company assumes responsibility is estimated based on historical returns and are accrued as a reduction of sales at the time of the original sale.

Use of Estimates—The preparation of the Company’s consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Management makes estimates including but not limited to the following financial statement items; allowance for doubtful accounts, slow-moving and obsolete inventory, lower of cost or market provisions for inventory, long-lived asset and goodwill impairments, contingencies including environmental liabilities, accrued expenses and self-insurance accruals, and income tax expense and net deferred tax assets. Actual results may differ from these estimates.

Cash and Equivalents—The Company considers all highly liquid interest-earning investments with an original maturity of three months or less at the date of purchase to be cash equivalents. The carrying value of cash and equivalents approximates their fair value.

Accounts Receivable—Trade accounts receivable consist of amounts owed for orders shipped to customers and are stated net of an allowance for doubtful accounts. Huttig’s corporate management establishes an overall credit policy for sales to customers. The allowance for doubtful accounts is determined based on a number of factors including when customer accounts exceed 90 days past due and specific customer account reviews.

Inventory—Inventories are valued at the lower of cost or market. The Company’s entire inventory is comprised of finished goods. The Company reviews inventories on hand and records a provision for slow-moving and obsolete inventory. The provision for slow-moving and obsolete inventory is based on historical and expected sales. Approximately 86% of inventories were determined by using the LIFO (last-in, first-out) method of inventory valuation as of December 31, 2013 and December 31, 2012. The balance of all other inventories is determined by the average cost method, which approximates costs on a FIFO (first-in, first-out) method. The FIFO cost would be higher than the LIFO valuation by \$11.7 million at December 31, 2013 and \$10.5 million at December 31, 2012.

Supplier Rebates—The Company enters into agreements with certain vendors providing for inventory purchase based rebates upon purchasing volumes. The Company accrues the receipt of rebates base on purchases and records vendor rebates as a reduction of the cost of inventory purchased.

Property, Plant and Equipment—Property, plant and equipment are stated at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the respective assets and is charged to operating expenses. Buildings and improvements lives range from 3 to 25 years. Machinery and equipment lives range from 3 to 10 years. The Company recorded depreciation expense of \$2.7 million, \$2.6 million and \$2.7 million in 2013, 2012 and 2011, respectively.

Goodwill—Goodwill for each reporting unit is reviewed for impairment annually or more frequently if certain indicators arise. The Company also reassesses useful lives of previously recognized intangible assets. The Company first assesses the qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. The Company does not calculate the fair value of a reporting unit unless it determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. If the two-step quantitative test is deemed necessary, the Company calculates the fair value using multiple assumptions of its future operations to determine future discounted cash flows including but not limited to such factors as sales levels, gross margin rates, capital requirements and discount rates. The carrying value of goodwill is considered impaired when a reporting unit's fair value is less than its carrying value. In that event, goodwill impairment is recognized to the extent recorded goodwill exceeds the implied fair value of that goodwill. As the Company continues to face a challenging housing environment and general uncertainty in the U.S. economy, its assumptions may change significantly in the future resulting in further goodwill impairments in future periods. See Note 2, "Goodwill and Other Intangible Assets" for additional information.

Valuation of Long-Lived Assets—The Company periodically evaluates the carrying value of its long-lived assets, including intangible and other tangible assets, when events and circumstances warrant such a review. The carrying value of long-lived assets is considered impaired when the anticipated undiscounted cash flows from such assets are less than the carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved.

Shipping and Handling—Costs associated with shipping and handling products to the Company's customers are charged to operating expense. Shipping and handling costs were \$28.4 million, \$26.9 million and \$27.2 million in 2013, 2012 and 2011, respectively.

Income Taxes—Deferred income taxes reflect the impact of temporary differences between assets and liabilities recognized for financial reporting purposes and such amounts recognized are for tax purposes using currently enacted tax rates. A valuation allowance would be established to reduce deferred income tax assets if it is more likely than not that a deferred tax asset will not be realized. The Company includes interest and penalties related to uncertain tax positions in income tax expense. See Note 10, "Income Taxes" for additional information.

Net Income (Loss) Per Share—Basic net income (loss) per share is computed by dividing income available to common stockholders by weighted average shares outstanding. Diluted net income (loss) per share reflects the effect of all other potentially dilutive common shares using the treasury stock method. See Note 11, "Basic and Diluted Net Income (Loss) Per Share" for additional information.

Accounting For Stock-Based Compensation—The Company has stock-based compensation plans covering the majority of its employee groups and a plan covering the Company's Board of Directors. The Company accounts for share-based compensation utilizing the fair value recognition provisions of ASC 718, "Compensation-Stock Compensation". The Company recognizes compensation cost for equity awards on a straight-line basis over the requisite service period for the entire award. See Note 9, "Stock and Incentive Compensation Plans" for additional information.

Concentration of Credit Risk—The Company is engaged in the distribution of building materials throughout the United States. The Company grants credit to customers, substantially all of whom are dependent upon the construction sector. The Company periodically evaluates its customers’ financial condition but does not generally require collateral. A significant portion of our sales are concentrated with a relatively small number of our customers. Our top ten customers represented 38% of our sales in 2013. In 2013, 2012, and 2011, the Company had a single customer representing 12%, 12% and 11% of total sales, respectively. This customer is a buying group for multiple building material dealers.

Segments—ASC 280, “Segment Reporting”, defines operating segments as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. At December 31, 2013 and 2012, under the definition of a segment, each of our branches is considered an operating segment of our business. Under ASC 280, operating segments may be aggregated if the operating segments have similar economic characteristics and if the nature of the products, distribution methods, customers and regulatory environments are similar. The Company has aggregated its branches into one reporting segment, consistent with ASC 280.

2. GOODWILL AND OTHER INTANGIBLE ASSETS

Under ASC 350, “Intangibles-Goodwill and Other”, goodwill is reviewed for impairment annually or more frequently if certain indicators arise. In addition, the statement requires reassessment of the useful lives of previously recognized intangible assets.

The Company first assesses qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill test. The Company does not calculate the fair value of a reporting unit unless it determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount.

ASC 350 prescribes a two-step process for impairment testing of goodwill. During the fourth quarter of 2013 and 2012, the Company performed the annual test for impairment of its reporting units. In 2012, the Company experienced lower than anticipated sales trends and operating income at one reporting unit. After performing the first step of the impairment test, we determined the carrying amounts of goodwill in our one reporting unit exceeded fair value. As a result, we performed the second step and determined that the goodwill was impaired by approximately \$1.9 million. In 2011, the Company recorded goodwill impairment of \$0.4 million related to the reduction in fair value of two reporting units. The following table summarizes goodwill activity for the three years ended December 31, 2012 (in millions):

	<u>Goodwill</u>	<u>Accumulated Impairments</u>	<u>Goodwill, Net</u>	
Balance at January 1, 2011	\$18.1	\$ (9.5)	\$ 8.6	
Impairments in 2012	—	(0.4)	(0.4)	
Balance at December 31, 2011	18.1	(9.9)	8.2	
Impairments in 2012	—	(1.9)	(1.9)	
Balance at December 31, 2012	18.1	(11.8)	6.3	
No activity in 2013	—	—	—	
Balance at December 31, 2013	<u>\$18.1</u>	<u>\$(11.8)</u>	<u>\$ 6.3</u>	
			<u>Cost</u>	<u>Accumulated Amortization</u>
			<u>2013</u>	<u>2012</u>
Amortizable intangible assets: (1)				
Customer relationships	<u>\$1.4</u>	<u>\$1.4</u>	<u>\$0.7</u>	<u>\$0.6</u>

(1) Amortizable intangible assets are included in “Other Assets”.

The Company recorded amortization expense of \$0.1 million for the years ended December 31, 2013, 2012 and 2011. The Company expects to record amortization expense for its existing intangible assets of approximately \$0.1 million in each year 2014 through 2018, and in total, approximately \$0.2 million thereafter.

3. ALLOWANCE FOR DOUBTFUL ACCOUNTS

The allowance for doubtful accounts consisted of the following (in millions):

	December 31,		
	<u>2013</u>	<u>2012</u>	<u>2011</u>
Balance at beginning of year	\$ 0.6	\$ 0.5	\$ 0.7
Provision charged to expense	—	0.6	0.7
Write-offs, less recoveries	—	(0.5)	(0.9)
Balance at end of year	<u>\$ 0.6</u>	<u>\$ 0.6</u>	<u>\$ 0.5</u>

The Company recorded bad debt expense of 0.0%, 0.1%, and 0.1% of net sales in 2013, 2012, 2011, respectively.

4. LONG-TERM DEBT

Debt consisted of the following (in millions):

	December 31,	
	<u>2013</u>	<u>2012</u>
Revolving credit facility	\$59.8	\$59.1
Other obligations	2.2	0.7
Total debt	62.0	59.8
Less current portion	1.2	0.6
Long-term debt	<u>\$60.8</u>	<u>\$59.2</u>

Credit Facility—The Company has a \$120.0 million asset based senior secured revolving credit facility (“credit facility”). Borrowing availability under the credit facility is based on eligible accounts receivable, inventory and real estate. The real estate component of the borrowing base amortizes monthly over 12.5 years on a straight-line basis. Borrowings under the credit facility are collateralized by substantially all of the Company’s assets and are subject to certain operating limitations applicable to a loan of this type, which, among other things, place limitations on indebtedness, liens, investments, mergers and acquisitions, dispositions of assets, cash dividends and transactions with affiliates. The entire unpaid balance under the credit facility is due and payable on December 21, 2017, the maturity date of the credit agreement.

At December 31, 2013, under the credit facility, the Company had revolving credit borrowings of \$59.8 million outstanding at a weighted average interest rate of 2.85%, letters of credit outstanding totaling \$3.6 million, primarily for health and workers’ compensation insurance, and \$41.2 million of additional committed borrowing capacity. The Company pays an unused commitment fee in the range of 0.30% to 0.375% per annum. In addition, the Company had \$2.2 million of capital lease and other obligations outstanding at December 31, 2013.

The sole financial covenant in the credit facility is the fixed charge coverage ratio (“FCCR”) which must be tested by us if the excess borrowing availability falls below an amount in the range of \$10.0 million to \$15.0 million, depending on our borrowing base, and must also be tested on a pro forma basis prior to consummation of certain significant business transactions outside our ordinary course of business, as defined in the agreement. At December 31, 2013, the Company’s FCCR was in excess of the 1.25:1.00 covenant requirement. The Company had \$41.2 million of excess borrowing availability at December 31, 2013.

Huttig believes that cash generated from our operations and funds available under the credit facility will provide sufficient funds to meet the operating needs of the business for at least the next twelve months. However, if Huttig's availability falls below the required threshold and the Company does not meet the minimum FCCR, our lenders would have the right, but not the obligation, to terminate the loan commitments and accelerate the repayment of the entire amount outstanding under the credit facility. The lenders could also foreclose on Huttig's assets that secure the credit facility. In that event, Huttig would be forced to seek alternative sources of financing, which may not be available on terms acceptable to the Company, or at all.

Maturities—At December 31, 2013, the aggregate scheduled maturities of debt are as follows (in millions):

2014	\$ 1.2
2015	0.4
2016	0.3
2017	60.0
2018	0.1
Total	<u>\$62.0</u>

The fair value of long-term debt, as calculated using the aggregate cash flows from principal and interest payments over the life of the debt, was approximately \$59.8 million and \$59.1 million at December 31, 2013 and 2012, respectively, based upon a discounted cash flow analysis using current market interest rates. The fair value measurement inputs for long-term debt are classified as Level 3 (unobservable inputs) in the valuation hierarchy as defined by ASC 820, "Fair Value Measurements and Disclosures".

5. PREFERRED SHARE PURCHASE RIGHTS

The Company has authorized 5.0 million shares of \$0.01 par value preferred stock, of which 250,000 shares have been designated as Series A Junior Participating Preferred Stock.

6. OTHER ACCRUED LIABILITIES

The Company has other accrued liabilities at December 31, 2013 and December 31, 2012 of \$13.1 million and \$14.3 million, respectively. Liabilities for self-insurance accruals were \$3.5 million and \$4.5 million, amounts due for sales incentive programs were \$3.6 million and \$3.1 million and deferred rent was \$1.3 million and \$1.5 million at December 31, 2013 and 2012, respectively.

7. COMMITMENTS AND CONTINGENCIES

The Company leases certain of its vehicles, equipment and distribution facilities from various third parties with non-cancelable operating leases with various terms. Certain leases contain renewal or purchase options. Future minimum payments, by year, and in the aggregate, under these leases with initial terms of one year or more consisted of the following at December 31, 2013 (in millions):

	<u>Non- cancelable Operating Leases</u>	<u>Minimum Sublease Income</u>	<u>Net</u>
2014	\$10.3	\$(1.5)	\$ 8.8
2015	10.0	(1.4)	8.6
2016	7.6	(0.3)	7.3
2017	5.2	—	5.2
2018	3.8	—	3.8
Thereafter	2.9	—	2.9
Total minimum lease payments	<u>\$39.8</u>	<u>\$(3.2)</u>	<u>\$36.6</u>

Operating lease obligations expire in varying amounts through 2020. Rental expense for all operating leases was \$12.9 million, \$13.6 million and \$14.8 million in 2013, 2012 and 2011, respectively. Sublease income was \$0.7 million, \$0.6 million and \$0.9 million in 2013, 2012 and 2011, respectively. Operating lease expense in 2011 is net of a one-time \$0.9 million payment to the Company to relinquish lease rights to a long term operating lease.

The Company carries insurance policies on insurable risks with coverage and other terms that it believes to be appropriate. The Company generally has self-insured retention limits and has obtained fully insured layers of coverage above such self-insured retention limits. Accruals for self-insurance losses are made based on claims experience. Liabilities for existing and unreported claims are accrued for when it is probable that future costs will be incurred and can be reasonably estimated.

In 1995, Huttig was identified as a potentially responsible party in connection with the cleanup of contamination at a formerly owned property in Montana that was used for the manufacture of wood windows. Huttig is voluntarily remediating this property under the oversight of and in cooperation with the Montana Department of Environmental Quality (Montana DEQ) and are complying with a 1995 unilateral administrative order of the Montana DEQ to complete a remedial investigation and feasibility study. The remedial investigation was completed by Huttig and approved in 1998 by the Montana DEQ, which has also issued its final risk assessment of this property. Since 1998 Huttig has remained in active discussions with the Montana DEQ, expanded the remedial investigation where warranted, implemented voluntary interim cleanup actions, conducted pilot tests, and tested remedial technologies in the field. Huttig is currently working with the Montana DEQ to develop a final feasibility study which will present and evaluate several potential remedies. The Montana DEQ is ultimately expected to publicize a final remedy for public comment. After consideration of public comments, the Montana DEQ will then publish a record of decision and negotiate with Huttig for an administrative order of consent on the implementation of the final remedy. Huttig spent less than \$0.5 million on costs related to this site in each of the years ended December 31, 2013, 2012 and 2011. The annual level of future remediation expenditures is difficult to estimate because of the uncertainty relating to the final remedy to be selected by the Montana DEQ. As of December 31, 2013, the Company has accrued \$0.6 million for future costs of remediating this site, which management believes represents a reasonable estimate based on current facts and circumstances and the currently expected costs of remediation. Until the Montana DEQ selects a final remedy, however, management cannot estimate the top of the range of loss or cost to Huttig of the final remediation order. As a result, the Company may incur material adverse effect on the consolidated financial statements in the future with respect to this property.

In addition, some of the Company's current and former distribution centers are located in areas of current or former industrial activity where environmental contamination may have occurred, and for which it, among others, could be held responsible. The Company currently believes that there are no material environmental liabilities at any of our distribution center locations.

The Company accrues expenses for contingencies when it is probable that an asset has been impaired or a liability has been incurred and management can reasonably estimate the expense. Contingencies for which the Company has made accruals include environmental, product liability and other legal matters. It is possible, however, that future results of operations for any particular quarter or annual period and our financial condition could be materially affected by changes in assumptions or other circumstances related to these matters.

8. EMPLOYEE BENEFIT PLANS

Defined Contribution Plans—The Company sponsored a qualified defined contribution plan covering substantially all its employees. The Company suspended the matching contributions effective January 2009.

Defined Benefit Plans—The Company participates in several multi-employer pension plans that provide benefits to certain employees under collective bargaining agreements. The risks of participating in these multi-

employer plans are different from single-employer plans in the following aspects: 1) assets contributed to the multi-employer plan by one employer may be used to provide benefits to employees of other participating employers 2) if a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers, and 3) if the Company chooses to stop participating in some of its multi-employer plans, the Company may be required to pay those plans an amount based on the underfunded status of the plan, referred to as a withdrawal liability. Total contributions to these plans were \$0.6 million in the year ended 2013 and \$0.5 million in each of the years ended 2012 and 2011. A majority of the contributions are to the Western Conference of Teamsters Pension Plan. The Company does not contribute more than 5 percent of total contributions for any of these multi-employer pension plans. The Company's participation in the multi-employer pension plans for the year ended December 31, 2013 is outlined in the table below.

<u>Legal Name of Plan</u>	<u>EIN—Plan Number</u>	<u>Pension Protection Act Zone Status</u>	<u>Financial Improvement Plan</u>	<u>Surcharge Imposed</u>	<u>Expiration Date of Collective-Bargaining Agreement</u>	<u>12/31/2013 Company Participants</u>
Western Conference of Teamsters Pension Plan	91-6145047 - 001	Funded > 80%	No	No	6/30/2014 to 4/30/2015	85
Southern California Lumber Industry Retirement Fund	95-6035266 - 001	Funded > 80%	No	No	6/30/2014	12
Central States, Southeast and Southwest Areas Pension Plan	36-6044243 - 001	Funded < 65%	Implemented	Yes	3/31/2016	4

9. STOCK AND INCENTIVE COMPENSATION PLANS

EVA Incentive Compensation Plan

The Company's EVA Incentive Compensation Plan is intended to maximize shareholder value by aligning management's interests with those of shareholders by rewarding management for sustainable and continuous improvement in operating results. The Company recorded \$0.8 million, \$1.3 million and \$0.4 million in expense related to this plan in the years ended December 31, 2013, 2012 and 2011, respectively.

2005 Executive Incentive Compensation Plan

Under the Company's 2005 Executive Incentive Compensation Plan, which was adopted in 2005 and subsequently amended in 2007, 2009, and 2012 ("2005 Plan"), incentive awards of up to 6,125,000 shares of common stock may be granted. In addition, upon adoption of this plan, no further awards may be issued under either the 1999 Stock Incentive Plan or the 2001 Stock Incentive Plan; however, shares forfeited under those plans are available for subsequent issuance under this 2005 Plan. The 2005 Plan allows the Company to grant awards to key employees, including restricted stock awards and stock options, subject primarily to the requirement of continued employment. The awards for the 2005 Plan are available for grant over a ten-year period unless terminated earlier by the Board of Directors. No options were issued in 2013, 2012 or 2011. The Company granted 570,680, 970,250, and 1,149,750 shares of restricted stock in 2013, 2012, and 2011, respectively. No monetary consideration is paid to the company by employees who receive restricted stock. The restricted shares vest ratably over three years. Restricted stock can be granted with or without performance restrictions.

2005 Non-Employee Directors' Restricted Stock Plan

Under the Company's 2005 Non-Employee Directors' Restricted Stock Plan, which was adopted in 2005 and subsequently amended in 2007, 2009, and 2012, incentive awards of up to 575,000 shares of common stock may be granted. The awards for this plan are available for grant over a ten-year period unless terminated earlier

by the Board of Directors. The Company granted 34,818, 78,064, and 52,500 restricted stock units in 2013, 2012, and 2011, respectively. These grants vest approximately one year later on the date of the following annual shareholders' meeting.

Accounting For Stock-Based Compensation

The Company recognized approximately \$1.0 million, \$0.8 million, and \$0.5 million in non-cash stock compensation expense for restricted stock awards in 2013, 2012 and 2011, respectively.

At December 31, 2013, the Company had 2,062,273 shares available under all of the stock compensation plans. On January 28, 2014, the Company issued 456,253 restricted shares.

Stock Options

The fair value of each option award is estimated as of the date of grant using the Black-Scholes option pricing model. The Company has not granted stock options in 2013, 2012 or 2011.

The following table summarizes the stock option transactions pursuant to the Company's stock incentive plans for the three years ended December 31, 2013:

	<u>Shares (000's)</u>	<u>Weighted Average Exercise Price Per Share</u>	<u>Average Remaining Contractual Term (Years)</u>	<u>Aggregate Intrinsic Value (000's)</u>	<u>Average Remaining Vesting Period Period (months)</u>	<u>Unrecognized Compensation Expense (000's)</u>
Options Outstanding at January 1, 2011	251	\$7.81				
Granted	—	—				
Exercised	—	—				
Forfeited	(40)	4.34				
Options Outstanding at December 31, 2011	211	8.47				
Granted	—	—				
Exercised	—	—				
Forfeited	(6)	9.13				
Options Outstanding at December 31, 2012	205	8.46				
Granted	—	—				
Exercised	—	—				
Forfeited	(18)	9.01				
Options Outstanding at December 31, 2013	<u>187</u>	<u>\$8.40</u>	<u>1.2</u>	<u>—</u>	<u>—</u>	<u>\$—</u>
Exercisable at December 31, 2013	<u>187</u>	<u>\$8.40</u>	<u>1.2</u>	<u>—</u>	<u>N/A</u>	<u>N/A</u>

The following table summarizes information about stock options outstanding at December 31, 2013:

<u>Range of Exercise Price</u>	<u>OPTIONS OUTSTANDING</u>			<u>OPTIONS EXERCISABLE</u>	
	<u>Number Outstanding (000's)</u>	<u>Weighted Average Remaining Contractual Life (Years)</u>	<u>Weighted Average Exercise Price</u>	<u>Number Exercisable (000's)</u>	<u>Weighted Average Exercise Price</u>
\$7.23	76	0.3	\$ 7.23	76	\$ 7.23
\$8.78	71	2.1	8.78	71	8.78
\$9.12	5	1.6	9.12	5	9.12
\$10.09	35	1.3	10.09	35	10.09
Total	<u>187</u>	<u>1.2</u>	<u>\$ 8.40</u>	<u>187</u>	<u>\$ 8.40</u>

Restricted Stock and Restricted Stock Units

Restricted stock grants are recorded as unearned compensation on the date of grant in additional paid in capital at fair market value. The unearned compensation is being amortized to expense over the respective vesting periods.

The following summary presents the information regarding the restricted stock and restricted stock units for the three years ended December 31, 2013:

	Shares (000's)	Weighted Average Grant Date Fair Value	Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (000's)	Average Remaining Vesting Period Period (months)	Unrecognized Compensation Expense (000's)
Outstanding at January 1, 2011	1,420	\$1.09				
Granted	1,202	0.75				
Restricted stock vested	(568)	1.21				
Forfeited	(17)	1.37				
Outstanding at December 31, 2011	2,037	0.85				
Granted	1,048	0.87				
Restricted stock vested	(854)	0.71				
Forfeited	(65)	0.71				
Outstanding at December 31, 2012	2,166	0.92				
Granted	605	2.35				
Restricted stock vested	(947)	0.75				
Forfeited	(16)	1.09				
Outstanding at December 31, 2013	<u>1,808</u>	<u>\$1.48</u>	<u>8.1</u>	<u>\$6,946</u>	<u>7.6</u>	<u>\$1,314</u>
Restricted stock units vested at December 31, 2013	<u>208</u>	<u>\$2.28</u>	<u>6.4</u>	<u>\$ 803</u>	<u>N/A</u>	<u>N/A</u>

10. INCOME TAXES

The provision for income taxes, relating to continuing operations, is composed of the following (in millions):

	<u>2013</u>	<u>2012</u>	<u>2011</u>
Current:			
U.S. Federal benefit	\$—	\$(0.1)	\$(0.1)
State and local tax (benefit)	0.1	0.1	(0.2)
Total current	<u>0.1</u>	<u>—</u>	<u>(0.3)</u>
Deferred:			
U.S. Federal tax (benefit)	—	—	—
State and local tax	—	—	—
Total deferred	<u>—</u>	<u>—</u>	<u>—</u>
Total income benefit	<u>\$ 0.1</u>	<u>\$—</u>	<u>\$(0.3)</u>

A reconciliation of income taxes based on the application of the statutory federal income tax rate to income taxes as set forth in the consolidated statements of operations follows:

	<u>2013</u>	<u>2012</u>	<u>2011</u>
Federal statutory rate	35.0%	35.0%	35.0%
Increase (decrease) in taxes resulting from:			
State and local taxes	2.0	2.0	2.0
Contingency accrual adjustment	(1.2)	—	2.6
Change in valuation allowance	(42.8)	96.6	(35.5)
Nondeductible items	5.9	(121.2)	(1.5)
Other, net	3.8	(12.4)	(0.3)
Effective income tax rate	<u>2.7%</u>	<u>— %</u>	<u>2.3%</u>

In 2013, the Company recorded income from continuing operations before income taxes of \$3.7 million. In 2012 and 2011, the Company recorded a loss from continuing operations before income taxes of \$0.1 million and \$13.0 million, respectively. The Company has recorded a decrease in the valuation allowance of \$1.5 million for the year ended December 31, 2013 and an decrease of \$0.1 million for the year ended December 31, 2012.

Deferred income taxes at December 31, 2013 and 2012 are comprised of the following (in millions):

	<u>2013</u>		<u>2012</u>	
	<u>Assets</u>	<u>Liabilities</u>	<u>Assets</u>	<u>Liabilities</u>
Property, plant and equipment	\$ 1.3	\$—	\$ 1.0	\$—
Goodwill	1.0	—	1.2	—
Employee benefits related	2.0	—	2.3	—
Inventories	0.6	—	0.9	—
LIFO		8.2	—	7.4
Insurance related	1.0	—	1.1	—
Other accrued liabilities	1.2	—	0.9	—
Accounts receivables	0.2	—	0.3	—
Income tax loss carryforwards	31.1	—	31.3	—
Other	0.5	0.6	0.6	0.6
Gross deferred tax assets and liabilities	<u>38.9</u>	<u>8.8</u>	<u>39.6</u>	<u>8.0</u>
Valuation allowance	(30.1)	—	(31.6)	—
Total	<u>\$ 8.8</u>	<u>\$ 8.8</u>	<u>\$ 8.0</u>	<u>\$ 8.0</u>

Huttig has gross deferred tax assets of \$38.9 million and a valuation allowance of \$30.1 million netting to deferred tax assets of \$8.8 million at December 31, 2013. After classifying \$0.9 of short-term deferred tax assets with short-term deferred tax liabilities, the Company has current deferred tax liabilities of \$7.9 million at December 31, 2013. The Company expects its deferred tax liabilities to be settled with utilization of its deferred tax assets. The deferred tax liabilities enable the Company to partially utilize the deferred tax assets at December 31, 2013 and the balance of the deferred tax assets are covered by the Company's valuation allowance. The Company is not relying on future pre-tax income at December 31, 2013 to support the utilization of the deferred tax assets.

The Company has both federal and state tax loss carryforwards reflected above. The Company's federal tax loss carryforwards of approximately \$69 million will begin to expire in 2028. The state tax loss carryforwards have expiration dates from 2014 to 2033. The total deferred income tax assets (liabilities) as presented in the accompanying consolidated balance sheets are as follows (in millions):

	<u>2013</u>	<u>2012</u>
Net current deferred taxes	\$(7.9)	\$(7.1)
Net long-term deferred taxes	7.9	7.1

Huttig is subject to U.S. federal income tax as well as income tax of multiple state jurisdictions. The Company has substantially concluded all U.S. federal income tax matters for years through 2008. Open tax years related to state jurisdictions remain subject to examination but are not considered material. The Company has no material uncertain tax positions at December 31, 2013.

11. BASIC AND DILUTED NET INCOME (LOSS) PER SHARE

The Company calculates its basic income per share by dividing net income allocated to common shares outstanding by the weighted average number of common shares outstanding. Unvested shares of restricted stock participate in dividends on the same basis as common shares. As a result, these share-based awards meet the definition of participating securities and the Company applies the two-class method to compute earnings per share. The two-class method is an earnings allocation formula that treats participating securities as having rights to earnings that would otherwise have been available to common stockholders. In periods in which the Company has net losses, the losses are not allocated to participating securities because the participating security holders are not obligated to share in such losses. The following table presents the number of participating securities and earnings allocated to those securities.

	<u>2013</u>	<u>2012</u>	<u>2011</u>
Earnings allocated to participating shareholders	\$0.2	\$—	\$—
Number of participating securities	1.7	2.0	2.3

The diluted earnings per share calculations include the effect of the assumed exercise using the treasury stock method for both stock options and unvested restricted stock units, except when the effect would be anti-dilutive. The following table presents the number of common shares used in the calculation of net income per share from continuing operations for the periods ended December 31, 2013 and December 31, 2012.

	<u>2013</u>	<u>2012</u>	<u>2011</u>
Weighted-average number of common shares-basic	22.8	22.9	22.1
Dilutive potential common shares	—	—	—
Weighted-average number of common shares-dilutive	<u>22.8</u>	<u>22.9</u>	<u>22.1</u>

The calculation of diluted earnings per common share for both the years ended December 31, 2013 and December 31, 2012 excludes the impact of antidilutive stock options and restricted stock units. The Company had 0.2 million stock options outstanding at December 31, 2013 which were all antidilutive.

12. SELECTED QUARTERLY FINANCIAL DATA (UNAUDITED)

The following table provides selected consolidated financial information from continuing operations on a quarterly basis for each quarter of 2013 and 2012. The Company's business is seasonal and particularly sensitive to weather conditions. Interim amounts are therefore subject to significant fluctuations (in millions, except per share data).

	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter</u>	<u>Full Year</u>
2013					
Net sales	\$124.5	\$148.9	\$153.3	\$134.8	\$561.5
Gross margin	23.1	29.8	30.8	27.4	111.1
Operating expenses	24.5	26.2	27.0	27.1	104.8
Operating income (loss)	(1.4)	3.6	3.8	0.3	6.3
Net income (loss) from continuing operations	(2.0)	2.8	3.2	(0.4)	3.6
Net loss from discontinued operations	—	(0.2)	(0.2)	—	(0.4)

13. DISCONTINUED OPERATIONS

The discontinued operations of the Company had no sales in 2013, 2012 or 2011. In 2013 and 2012, loss from discontinued operation of \$0.4 million was recorded in each year. In 2011, loss from discontinued operations of \$0.5 million was recorded. The loss in the three years is related to environmental and legal expenses related to the formerly owned property in Montana.

ITEM 9—CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

NONE

ITEM 9A—CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures—The Company, under the supervision and with the participation of our Disclosure Committee and management, including our Chief Executive Officer and our Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities and Exchange Act of 1934). Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective as of December 31, 2013 in all material respects in (a) causing information required to be disclosed by us in reports that we file or submit under the Securities and Exchange Act of 1934 to be recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms and (b) causing such information to be accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in the Company’s internal control on financial reporting during the Company’s fiscal fourth quarter ended December 31, 2013 that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

Control systems must reflect resource constraints and be cost-effective, can be undercut by simple errors and misjudgments, and can be circumvented by individuals within an organization. Because of these and other inherent limitations in all control systems, no matter how well they are designed, our disclosure controls and procedures and internal controls can provide reasonable, but not absolute, protection from error and fraud.

Management’s Report on Internal Control Over Financial Reporting—The Company’s management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control—Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Management’s assessment included an evaluation of the design of Huttig Building Products, Inc.’s internal control over financial reporting and testing of the operational effectiveness of its internal control over financial reporting. Management reviewed the results of its assessment with the Audit Committee of our Board of Directors. Based on our evaluation under the framework in *Internal Control—Integrated Framework (1992)*, our management concluded that our internal control over financial reporting was effective as of December 31, 2013.

ITEM 9B—OTHER INFORMATION

NONE

PART III

ITEM 10—DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information regarding executive officers and directors of Huttig is set forth in the Company's definitive proxy statement for its 2014 Annual Meeting of Stockholders (the "2014 Proxy Statement") under the caption "Executive Officers" and "Election of Directors", respectively, and is incorporated herein by reference. Information regarding Section 16(a) beneficial ownership reporting compliance is set forth in the 2014 Proxy Statement under the caption "Section 16(a) Beneficial Ownership Reporting Compliance," and is incorporated herein by reference.

The information regarding the Company's "audit committee financial expert" and identification of the members of the Audit Committee of the Company's Board of Directors is set forth in the 2014 Proxy Statement under the caption "Board Committees" and is incorporated herein by reference.

The Company adopted a Code of Business Conduct and Ethics applicable to all directors and employees, including the principal executive officer, principal financial officer and principal accounting officer. The Code of Business Conduct and Ethics is available on the Company's website at www.huttig.com. The contents of the Company's website are not part of this Annual Report. Stockholders may request a free copy of the Code of Business Conduct and Ethics from:

Huttig Building Products, Inc.
Attention: Corporate Secretary
555 Maryville University Dr.
Suite 400
St. Louis, Missouri 63141
(314) 216-2600

The Company intends to post on its website any amendments to, or waivers from, its Code of Business Conduct and Ethics within two days of any such amendment or waiver.

ITEM 11—EXECUTIVE COMPENSATION

The information required by Item 11 is set forth in the 2014 Proxy Statement under the captions "Board of Directors and Committees of the Board of Directors," "Executive Compensation," "Compensation Committee Interlocks and Insider Participation" and "Report on Executive Compensation by the Management Organization and Compensation Committee of the Company" and is incorporated herein by reference.

ITEM 12—SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Except as set forth below, the information required by Item 12 is set forth in the 2014 Proxy Statement under the captions "Beneficial Ownership of Common Stock by Directors and Management" and "Principal Stockholders of the Company," and is incorporated herein by reference.

Equity Compensation Plan Information

The following table presents information, as of December 31, 2013, for equity compensation plans under which Huttig's equity securities are authorized for issuance.

<u>Plan Category</u>	<u>Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)</u>	<u>Weighted-average exercise price of outstanding options, warrants and rights (b)</u>	<u>Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)</u>
Equity compensation plans approved by security holders	187,250(1)	\$8.40	—
Equity compensation plans not approved by security holders	—	N/A	<u>2,062,273</u>
Total	<u>187,250</u>	<u>\$8.46</u>	<u>2,062,273</u>

(1) All of these securities have been issued under equity compensation plans approved by the shareholders at December 31, 2013.

ITEM 13—CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by Item 13 is set forth in the 2014 Proxy Statement under the caption “Certain Relationships and Related Transactions and Director Independence,” and is incorporated herein by reference.

ITEM 14—PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by Item 14 is set forth in the 2014 Proxy Statement under the caption “Principal Accounting Firm Services and Fees,” and is incorporated herein by reference.
